

THE UNIVERSITY OF
KANSAS

Kansas Athletics

Lynn Electric Communications, Inc. has delivered our projects on time and within budget consistently. They provide the quality of workmanship we must rely on in our business. Their management and supervision has been a pleasure to work with as we have found them to be honest and they have committed to be team players with the Athletic Department. I am pleased to recommend Lynn Electric Communications, Inc. as a quality low-voltage contractor with exceptional scheduling and management abilities.

Lynn Electric & Communications

Ryan Kruse

Your technicians are so kind and upfront, thank you for making our new security system such an easy process. Going from never having a security system to using one twice daily, was much easier knowing we had the help of Lynn Electric & Communications. We have accidentally set it off twice in the first week, but the response from your monitoring staff was impeccable. We appreciate your fast and friendly service, as much as you do our business. Please forward this message on to your staff.

Re: Lawrence Public School District
CCTV and Access Control Electrical Installation

Dear Ryan,

I'd like to take this opportunity to formally thank you and your team for the excellent job we just completed for the Lawrence School District. Ben and the rest of his crew worked incredibly hard in a very busy environment and did so with minimal disruptions in each school. Your team's work will definitely improve the quality of the children's learning environment for many years to come.

I look forward to my next opportunity to work with Lynn Electric.

Sincerely,

Chris Koke
Project Manager

Lynn Electric Communications and Security

Attn: Ryan Kruse

Mr. Kruse,

I would like to thank you for the quick response in taking over our security monitoring from ADT. Your technician was so helpful in explaining everything from arming and disarming to how police and medical was dispatched. The transition was seamless, something we have come to expect from Lynn Electric and Communications.
